The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. Continuation of 3. NOTE: The proposed amendments to the claims present new issues that would require further consideration, e.g. "said hinge being attachable to one of said side walls at a vertical position which location is a function of whether the door will open from the door's right side or left side." This limitation differs from those previously presented and would accordingly require further consideration.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments with respect to the 35 USC 102(b) rejections made in the final rejection in view of Trulaske are not persuasive as the prior art discloses all of the limitations as claimed and accordingly the rejections are maintained. The connections between various claimed elements (top and bottom walls connected to side walls, door attached to side wall, etc.) and the functional abilities of the elements are all present as claimed (elements not explicitly disclosed as directly attached are clearly at least attached via intermediate elements). Further, while likely not intended by Trulaske, his device could be used as a storage cabinet in an inverted position. Finally, Trulaske does in fact disclose a bottom wall, spacer panel, and vertically adjustable door (the terms "bottom wall" and "spacer panel" in and of themselves do not require or even suggest structure beyond that present in Trulaske, while the door would be vertically adjustable in as much as Applicant's door is and would further be vertically adjusted when and if the device was inverted for alternating door operation).
